Subject: FW: Jet fuel spill at ft hood
Date: Thursday, January 30, 2014 6:43:48 PM

Nicolas,

Here are Darryl's comments from the on-site response earlier today.

Within Darryl's comments, he mentions several Fort Hood personnel he met with. Additionally, he provides the coordinates of the vacuum truck location. I am still trying to get information on whether there is a specific contact you need, as well as a specific gate/entrance you would need to go to. Hopefully this information helps in the interim.

If I am able to find out any more specific information tonight I will let you know via email. Please feel free to call or email if you have any questions or need further information.

Thanks

Kati Wooten

Kati,

This is Darryl's comments.

Thanks - this is great. Please have someone circle back tomorrow to see how clean up progresses.

Thanks
David

>
> Elizabeth and I met with Mr. Jerry Mora at approximately 12:30 hours. Mr. Mora took us to the unnamed tributary to Reese Creek at a point where a vacuum truck (Ft Hood Environmental) was skimming the surface of the water. The approximate coordinates for the location of the vacuum truck are N31.05671 W97.83241. From the location of the vacuum truck the fuel had traveled another 150 feet downstream. Mr. Poff took a water paste and dipped it into the water in several places. A small portion of water was found under 2-3 inches of fuel. I observed the movement of water down several riffle areas that Mr. Poff stated was fuel moving downstream.
>
> The spill was discovered around 06:30 hours and the response by Ft Hood personnel was immediate. The spill originated from a small tank farm next to the airport (coordinates N31.06361 W97.83691). A valve failed outside of the containment area and the fuel took the path of least resistance to the unnamed tributary to Reese Creek.
